CHERRIES | Responsible Healthcare Ecosystems is an EC funded project aimed to support Responsible Research and Innovation (RRI) policy experiments in the healthcare sector in three European territories – in **Murcia (ES)**, **Örebro (SE)** and the **Republic of Cyprus (CY)**.

The CHERRIES experiments address opportunities and challenges associated with the role of demand at the crossroads of challenge-oriented, economy-enhancing, and sector-specific policy making within the healthcare sector, thereby addressing the SGC of health, demographic change and wellbeing.

The project aims to create more open, inclusive, and self-sustaining R&I ecosystems by ensuring the active involvement of all actors in the definition of needs, solutions and innovation policies of regional healthcare ecosystems in Europe.
