Dear Sir/Madame,

You are cordially invited to the event **Beyond the CHERRIES Project** for a presentation of the CHERRIES Cyprus pilot: An e-HEALTH solution for provision of healthcare services in remote areas. The event will take place on Friday 14th of October 2022 at the premises of the Gravity Incubator in Nicosia. It is coordinated by the Cyprus Research and Innovation Center as the leader of the Cyprus team for CHERRIES in collaboration with the Aretaeion Hospital.

The event is targeted towards policy makers, healthcare stakeholders and affiliates who can benefit from the promising results of the regional pilot in eHealth as part of the H2020 project CHERRIES. The Cyprus pilot deployed a technological solution aiming at accessibility and high quality of medical services to the population of rural areas and remote villages (or anybody else facing difficulties in physically accessing medical centres and health professionals) without them having to travel long distances to gain access to healthcare services. The process of the implementation and the main component of the pilot was based on the notion of co-creation.

- **Date & Time: Friday, 14 October 2022, 17:30 – 19:30 (EET)**
- Gravity Incubator, 2 Theodorou Kolokotroni Street Engomi, Nicosia 2408

More information on the CHERRIES project is available in the next page.

The event will be followed by a cocktail reception.

Please inform **Maria Anastasi** at m.anastasi@cyric.eu of your availability to attend the event and cocktail reception. We would appreciate your response to this invitation by September 23rd, 2022.

Sincerely,

Dr. Panayiotis Philimis
CEO Cyprus Research and Innovation Center

About CHERRIES

CHERRIES | Constructing Healthcare Environments through Responsible Research Innovation and Entrepreneurship Strategies is an EU funded project aimed at enabling Responsible, Research and Innovation (RRI) policy experiments in the healthcare sector in three European territories – in Murcia (ES), Örebro (SE) and the Republic of Cyprus (CY). Find out more by visiting www.cherries2020.eu.

About the workshop:

Title Results of the Cyprus CHERRIES pilot: An e-HEALTH solution for provision of healthcare services in remote areas.

Description:

Healthcare in Cyprus has undergone substantial improvement with the recent long-anticipated implementation of a comprehensive National Health-care System, set to make the sector more streamlined and cost effective. Major challenges face today's health care system for which health professionals including public and private hospitals and clinics, must be prepared. There is an immense need for better coordination, communication, and more efficient processes within the hospital but also with the patient experience as well as other key stakeholders of the health care ecosystem. In addition, we have both a culture and organization of care that separate our care into distinct systems such as hospitals, home care, skilled nursing facilities, with little formal communication, relationships, or collaboration between and among those settings.
